got a offer later from *cyber x technology*.

located in GCC Aurangabad
431001, maharashtra, india as a
front end developer from on
campus interviews

Summary :

Highly motivated and passionate MERN stack developer with a strong foundation in web development. Proficient in building dynamic and responsive web applications using MongoDB, Express.js, React.js, and Node.js. Skilled in translating requirements into well-structured code and delivering high-quality software solutions. Possessing a solid understanding of front-end and back-end development principles, I am eager to contribute to a collaborative team while continuously expanding my skills in the rapidly evolving field of web development.

Skill Highlights:

**Html, css, javascript,
bootstrap, tailwind-css,react.js**

Experience

1. SKILLHUB (08-22 to 02-23)

Kranti chowk, sambhajanagar, (aurangabad), mh, ind

6 months internship as a web developer

ROLES & RESPONSIBILITIES:

- ❖ Developing and maintain responsible and full application using **MERN** stack.
- ❖ Designing and maintain respectful API'S and backend services using **NODE-JS** and **EXPRESS-JS**.
- ❖ Building interactive interfaces using react-js and ensuring a smooth user experience.
- ❖ Working with database particularly mongo-db for data storage and retrieval.
- ❖ Implementing authentication and authorization mechanisms in web application.
- ❖ Collaborating with cross-functional teams, including designers and product managers, to gather requirements and deliver high-quality software solutions.
- ❖ Conducting thorough testing and debugging to ensure the reliability and performance of web applications.
- ❖ Optimizing web applications for maximum speed, scalability, and responsiveness.
- ❖ Working with version control systems (e.g., Git) to track and manage code changes.
- ❖ Keeping up-to-date with emerging technologies, libraries, and frameworks related to the MERN stack.
- ❖ Participating in code reviews and providing constructive feedback to improve code quality.
- ❖ Troubleshooting and resolving technical issues and bugs.
- ❖ Deploying web applications to cloud platforms, such as cyclic or railway.sh.
- ❖ Documenting software functionalities, APIs, and technical specifications.
